### **ABOUT MAXWELL TECHNOLOGIES**

Maxwell sells reliability. We develop, manufacture and market electronic components and systems that perform reliably for the life of the applications into which they are integrated. Our BOOSTCAP® ultracapacitors and ultracapacitor-based energy storage systems uniquely address applications in transportation and consumer and industrial electronics. Our high-voltage grading and coupling capacitors are used in electric utility infrastructure and other applications involving transport, distribution and measurement of high voltage electrical energy. Our radiation-mitigated microelectronic products include power modules, memory modules and single board computers that primarily address applications in aerospace.
